

# SF 120

## OVERVIEW

This profile creates a deep double-sided frame. It has recessed grooves on the perimeter of both sides of the frame. The end result is an upscale frameless look that displays the graphic from edge to edge. This solution allows the SEG banner to be replaced easily without the use of tools, making assembly quick and simple.

## APPLICATIONS

This frame is most commonly used in retail applications as well as interior design. It's deep profile makes it a statement piece in any room. It can be freestanding, hanging or even ceiling mounted to create a virtual skylight.
