SFBD 140

Overview
This deep, double-sided backlit display is designed for optimal light diffusion across SEG banners, utilizing high-power LEDs to deliver a strikingly bright, edge-to-edge image without any hotspots. Its innovative engineering ensures uniform illumination, enhancing the vibrancy and clarity of graphics.

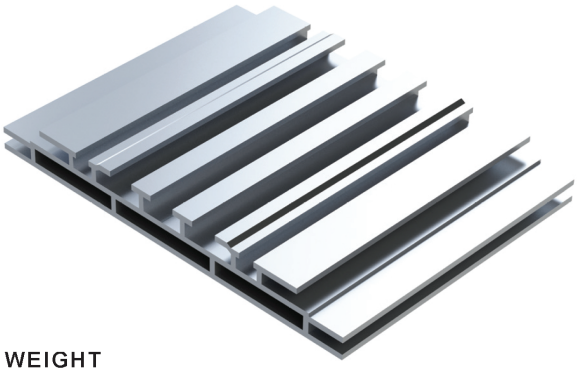

Applications
With its bold, freestanding profile, this display is perfect for creating a strong visual impact at industry conventions and trade shows. Its eye-catching design and exceptional brightness make it an ideal choice for brands looking to stand out and draw attention in competitive environments, ensuring that your messaging resonates with audiences.
