

# SFD 140

## OVERVIEW

The SFD 140 has recessed grooves on the perimeter of both sides of the frame. The end result is an upscale frameless look that displays the graphic from edge to edge. This solution allows the SEG banner to be replaced easily without the use of tools, making assembly quick and simple.

## APPLICATIONS

This frame is most often used in retail stores as freestanding displays. Its deep profile makes it very versatile. It can be used hanging or freestanding.
